RV Toilet Service Parts for Aria CLASSIC

Tools Needed
• Adjustable wrench
• 7/16” wrench
• Flat-blade screwdriver
• Pliers
• Towels

Notes
• Read all instructions before beginning work.

To Remove Toilet
1. Turn off RV water supply per RV Owner’s Manual.
2. Pry off Bolt Caps with flat-blade screwdriver.
3. Use wrench to remove 7/16 -inch Lag Screws.
5. Place an old towel or soft cloth on work surface. Remove Toilet from floor and place upside down, with front facing you, on work surface.
6. Remove old Closet Flange Seal (may be found on Toilet or in floor at Closet Flange). Discard.
7. Cover Holding Tank opening to contain odor.

To Remove Old Part
Note: Before removing/replacing parts, note which parts are broken. This kit contains parts that make up the pedal assembly and you may use all the parts necessary to make the fix. The following procedure assumes only the pedal is broken and needs to be replaced.
1. Actuate Pedal and hold. If damage to pedal will not allow this, pull open Left Cam Arm (Fig. A). With other hand, hold Water Valve Actuator in open position (Fig. B) to release tension from Cable. Release Pedal (if used to open Cam Arm). Push Left Cam Arm back in (Fig. A) and disconnect Cable End from it.
2. Actuate Pedal again, fully, and hold. If damage to pedal will not allow this, pull open Right Cam Arm (Fig. A). Hold Blade Actuator in open position (Fig. B). Release Pedal to release tension from Cable. Push Right Cam Arm back in (Fig. A) and disconnect Cable End from it.
3. Facing front of toilet, use screwdriver to pry out left side of Pedal Arm at pivot point in Pedal Bracket (Fig. A).

To Replace Part
1. Replace Pedal. Insert right side of Pedal in Pedal Bracket

Tools Needed
• Adjustable wrench
• 7/16” wrench
• Flat-blade screwdriver
• Pliers
• Towels

Notes
• Read all instructions before beginning work.
